RE: Dover Gas Light Site  
Public Meeting: February 17, 1994

Dear Randy:

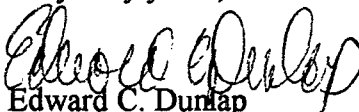

As requested, I am enclosing an outline for the presentation which Chesapeake Utilities Corporation intends to make at tomorrow's public meeting on the Dover Gas Light Site.

In preparing our presentation, we have assumed that EPA and/or DNREC personnel will make an initial presentation in which the proposed plan and the basic concepts contained in that plan will be discussed and explained, and that Chesapeake's presentation will follow this discussion. If that is not the order which EPA intends to follow, please so advise me at your earliest possible convenience.

Finally, we would like to determine how EPA and/or DNREC intends to document the comments made by the Agencies, by Chesapeake and by members of the general public. We understand that EPA has on occasion arranged for a court reporter to be present. If you do not intend to make such arrangements for this hearing, please let us know whether EPA will permit the hearing to be recorded on audio tape. We of course will provide the Agencies with a copy of any such recording.

As noted above, it is crucial that we know of EPA's plans regarding the issues addressed in this letter before the public meeting. Please contact me either at the office (734-6787).

Very truly yours,

  
Edward C. Dunlap  
Engineering Manager
